A MICHIGAN COMPANY

- PLATE BENDING
- ROLLFORMING & WELDING
- TUBE PERFORATING
- BEADING & FLANGING
- TUBE END FORMING
- HIGH PRECISION LATHES
- PRECISION STRAIGHTENING

Certified US Sales & Service

We provide *tailor-made solutions for specialized machinery applications* in Metal Forming, Tube and Pipe Fabrication. Our services span the lifetime of the product—from conception, prototyping, project management and installation to aftersales.

Long-term Success Through Service

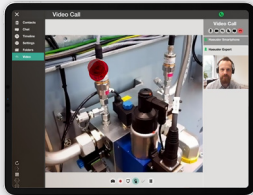

ETC's unbeatable combination of first class products and superior service-support ensures the success of our customers as well as our own success.

Remote Support Service

Using modern communication technologies such as remote maintenance systems and augmented reality, we are able to troubleshoot without sending a technician.

Spare part & Order

If a component is defective, we deliver almost every spare part worldwide.

Repair & Maintenance

As part of regular maintenance, we replace wearing parts or carry out a revision of the machine.

Know-how & Performance

Our partners represent generations of expertise in bending and metal-forming technology.

Workshops & Trainings

We train your operators and maintenance personnel at our premises or on your machines.

Custom Service Packages

You will receive premium service packages individually tailored to your needs.

Retrofit & Modernization

Business management aspects often speak in favour of modernization instead of purchasing a new machine.
